

A FIRST FOR VICTORIA'S HOUSING CRISIS.

Sustainable, affordable housing made from recyclable materials; Melbourne communities say, 'Yes Please!'

Tiny Homes Australia and Anchor Inc. have partnered with Dynamic Steel Frame and others to implement a pilot program designed to support small families and adults who are at risk of or experiencing homelessness.

Anchors program's include housing and case management support for people experiencing Homelessness and Family Violence, Out of Home Care Services, Family Therapy and Youth Development services incorporating FOYER like services and supported accommodation services for homeless youth and young single mums.

Anchor Inc. approached Tiny Homes Australia to assist and raise funds for the pilot, using sustainable and recyclable materials to build two Tiny Homes to help shift the housing crisis in the outer east.

The clear choice when selecting framing material when considering fire prone areas, termite damage and rust is Light Gauge Steel Frames (LGS). LGS is light weight, easy to manipulate, high strength to weight ratio and can be prefabricated fast.

Leading the way in LGS frames, Dynamic Steel Frame was approached by Anchor Inc. and Tiny Homes Australia to help support an open day event by donating LGS frames. When Tiny Homes outlined the project, they knew this was the perfect project for LGS frames and jumped on board to join the cause.

"Dynamic Steel Frame manufacture a range of steel and one of the fun things we do is building Tiny Homes for our customers. A Tiny Home made from light gauge steel is around

two thirds to one half the weight of what you would have in timber and it's more ridged. It won't warp, twist, rot, bow, camber or shrink. It's much easier to work on, is a lighter product for your tiny house"- Peter Blythe, Dynamic Steel Frame

An open day was held to grow awareness and raise funds for the project. Dynamic Steel Frame joined the team on the 21st July, displaying a bare framed Tiny Home along with many other Tiny Homes on display.

The open day was a huge success raising awareness for Anchors' mission towards an affordable solution to Australia's Housing Crisis. Around 2,000 people attended the open day with proceeds reaching just shy of \$3,000. All funds donated will go towards the development and build of two tiny homes to be used to house those needing support.

If you wish to donate, Anchors Give now account is linked below with further details on the project.
