

What is a Hyperchassis?

The Hyperchassis is a precision-engineered, light-gauge steel chassis system by Dynamic Steel Frame, purpose-built for modular and transportable construction.

Designed to deliver exceptional structural performance with minimal weight, it provides a durable, dimensionally stable base suitable for a wide range of modular applications.

Manufactured with advanced roll-forming technology and Truecore® steel, the Hyperchassis combines superior strength, accuracy, and long-term durability. Prefabricated to exact specifications, it offers a corrosion-resistant foundation that simplifies transport, accelerates on-site assembly, and ensures consistent installation precision.

Its innovative design enables fast manufacturing, efficient transport, and seamless installation, making it a smarter, stronger, and more sustainable choice for modern modular builds.

Optimised for scalability, repeatability, and engineering precision, the Hyperchassis delivers a robust solution that meets the demands of contemporary modular construction — offering strength, speed, and reliability from the ground up.

HYPERCHASSIS by Dynamic Steel Frame

The foundation that moves with you.

Whether building cabins, classrooms, or relocatable homes, Hyperchassis delivers precision, strength, and efficiency from the ground up.

**Proudly Australian-made and
engineered for modular
innovation.**

Hyperchassis

Engineered for Speed, Strength & Precision

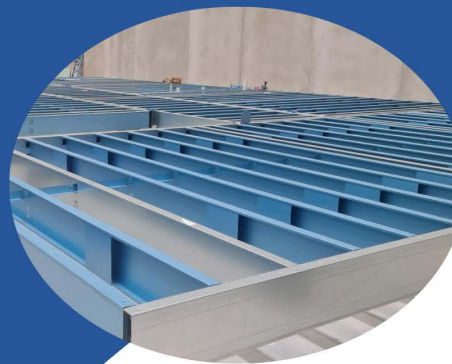

HYPERCHASSIS by Dynamic Steel Frame

The foundation that moves with you.

Whether building cabins, classrooms, or relocatable homes, Hyperchassis delivers precision, strength, and efficiency from the ground up.

**Proudly Australian-made and
engineered for modular
innovation.**

BUILT FOR SPEED

Precision-engineered using advanced roll-forming technology, Hyperchassis arrives ready to install or transport — minimising on-site time and maximising efficiency.

ENGINEERED STRENGTH

Made from high-tensile, galvanised Truecore® steel, Hyperchassis delivers superior structural integrity while maintaining a lightweight design for easy handling.

LIGHTWEIGHT & TRANSPORT-READY

Engineered for mobility, the chassis reduces transport costs while maintaining maximum load performance.

PRECISION & CONSISTENCY

Every component is digitally modelled and manufactured to exact specifications, ensuring perfect alignment, flawless fit, and reduced rework.

SUSTAINABLE BY DESIGN

Made from 100% recyclable steel, Hyperchassis is durable, corrosion-resistant, and environmentally responsible.

APPLICATIONS

- Modular homes
- Holiday park accommodation
- Portable classrooms
- Site offices
- Tiny homes & off-grid living solutions
